GOOGLE DEEPMIND • ADVANCED AGENTIC CODING

Catálogo Oficial de Capacidades

Mapeamento completo de Ferramentas Nativas, Servidores MCP, Agentes Autônomos e Habilidades Especializadas (Skills) prontas para execução.

19	9	23	478
FERRAMENTAS NATIVAS	SERVIDORES MCP	AGENTES ESPECIALISTAS	SKILLS CATALOGADAS

Workspace Ativo: MercadoFácil (Lista de Compras Inteligente)

Ambiente: Antigravity IDE • Windows x64

Gerado em: Outubro de 2026

1. Ferramentas Nativas do Sistema (Core Tools) 19 Ferramentas

Ferramentas de baixo nível integradas diretamente ao runtime do Antigravity. Fornecem acesso direto ao sistema de arquivos local, execução de comandos no terminal do usuário, navegação web e manipulação de arquivos.

IDENTIFICADOR	CLASSIFICAÇÃO / TIPO	DESCRIÇÃO & MODO DE OPERAÇÃO
`ask_question`	**Interação com o Usuário**	Exibe modal interativo com opções de múltipla escolha para validar decisões de arquitetura e design.
`browser_subagent`	**Automação de Navegador**	Controla um navegador real de forma autônoma para testar fluxos de tela e grava vídeos em WebP.
`call_mcp_tool`	**Invocação de MCP**	Executa sob demanda qualquer ferramenta dos servidores MCP externos conectados.
`generate_image`	**Geração Visual de UI**	Cria e refina interfaces de usuário, componentes gráficos e mockups visuais profissionais.
`grep_search`	**Busca Textual de Alta Velocidade**	Varre todo o projeto com ripgrep e regex para localizar linhas, métodos e padrões de código.
`list_dir`	**Navegação no Sistema de Arquivos**	Lista pastas e arquivos recursivamente com informações de tamanho e contagem de itens.
`list_resources`	**Descoberta de Recursos MCP**	Identifica recursos declarados em servidores MCP conectados ao ecossistema.
`manage_task`	**Orquestração de Processos**	Gerencia processos em segundo plano: verifica status, envia stdin ou encerra comandos assíncronos.
`mcp_gemini_get_doc`	**Documentação Oficial Gemini**	Recupera seções completas e detalhadas da documentação oficial da API do Gemini e GenAI SDK.
`mcp_gemini_search_docs`	**Busca na Documentação Gemini**	Pesquisa em tempo real APIs, parâmetros, métodos e guias da biblioteca oficial @google/genai.
`multi_replace_file_content`	**Edição Multi-Blocos Cirúrgica**	Aplica múltiplas substituições não-contíguas em um mesmo arquivo com precisão cirúrgica.
`read_resource`	**Leitura de Recursos MCP**	Lê o conteúdo binário ou textual de URIs expostas pelos servidores MCP conectados.
`read_url_content`	**Web Scraping & Leitura Web**	Extrai páginas públicas e documentações de bibliotecas convertendo HTML em Markdown limpo.
`replace_file_content`	**Refatoração de Bloco Único**	Substitui blocos específicos de código sem corromper comentários ou a formatação existente.
`run_command`	**Execução Terminal Nativa**	Executa comandos PowerShell e scripts de sistema operacional com suporte a tarefas em background.
`schedule`	**Agendamento de Tarefas & Cron**	Configura timers pontuais ou agendamentos cron recorrentes para monitoramento autônomo.

IDENTIFICADOR	CLASSIFICAÇÃO / TIPO	DESCRIÇÃO & MODO DE OPERAÇÃO
`search_web`	**Pesquisa Global na Web**	Pesquisa na internet dados em tempo real, bibliotecas e soluções atualizadas para problemas complexos.
`view_file`	**Leitor Universal de Arquivos**	Visualiza código-fonte, imagens, PDFs, vídeos e logs com paginação eficiente e fatiamento.
`write_to_file`	**Criação Segura de Arquivos**	Cria novos arquivos de código, configurações e artefatos em qualquer nível de diretório.

2. Servidores MCP Integrados (Model Context Protocol)

9 Servidores

Servidores MCP externos conectados à sessão, provendo integração com serviços em nuvem (GitHub, Supabase, Google Cloud), bancos de dados em grafo (Neo4j AuraDB), execução interativa de código e ferramentas de design.

github

26 Ferramentas

Controle de Versão & Git Remoto

Criação de repositórios, envio de commits (push), controle de branches, pull requests, issues e busca de repositórios diretamente via API do GitHub.

neo4j

3 Ferramentas

Grafo de Conhecimento & Memória AuraDB

Execução de consultas Cypher (leitura e escrita) para armazenar contexto permanente entre sessões, relacionamentos do projeto e artefatos de design.

supabase-mcp-server

27 Ferramentas

PostgreSQL & Nuvem Supabase

Gerenciamento completo de projetos Supabase: criação de tabelas, execução de SQL, migrações seguras, deploy de Edge Functions e monitoramento de logs.

data-agent-kit

4 Ferramentas

Google Cloud Platform (GCP)

Descoberta e orquestração de recursos analíticos no Google Cloud: BigQuery, Dataform, pipelines de dados e Cloud Composer.

stitch

16 Ferramentas

Design Systems & UI Prototyping

Geração e edição visual de telas, criação e aplicação de design systems a partir de arquivos design.md e exportação de layouts.

notebooks

11 Ferramentas

Jupyter Notebooks Interativos

Criação, execução celular, inspeção de saídas e visualização de dados em notebooks Python e BigQuery (.ipynb).

gemini-api-docs

2 Ferramentas

Documentação Oficial Gemini

Consulta ao vivo à documentação e schemas do SDK do Google Gemini (@google/genai) para garantir implementações 100% aderentes.

hf-mcp-server

4 Ferramentas

Hugging Face Hub

Pesquisa e exploração de modelos open-source de Machine Learning, repositórios de datasets e arquivos no ecossistema Hugging Face.

visualization

1 Ferramentas

Visualização de Dados & Gráficos

Renderização e geração de gráficos estatísticos, relatórios visuais e gráficos interativos para análise de dados.

3. Agentes Especialistas (Personas & Domínios)

23 Agentes

Agentes com comportamentos, personas, restrições e padrões dedicados para cada etapa do ciclo de vida de desenvolvimento de software (SDLC). São ativados automaticamente por roteamento inteligente ou convocados sob demanda.

AI & RAG Engineer

`@ai-engineer`

name: ai-engineer

Backend Development Architect

`@backend-specialist`

Note: This agent loads relevant skills for detailed guidance. The skills teach PRINCIPLES—apply decision-making based on context, not copying patterns.

Code Archaeologist

`@code-archaeologist`

Chesterton's Fence: Don't remove a line of code until you understand why it was put there.

Database Architect

`@database-architect`

Note: This agent loads database-design skill for detailed guidance. The skill teaches PRINCIPLES—apply decision-making based on context, not copying patterns...

Debugger - Root Cause Analysis Expert

`@debugger`

Don't guess. Investigate systematically. Fix the root cause, not the symptom.

DevOps Engineer

`@devops-engineer`

Automate the repeatable. Document the exceptional. Never rush production changes.

Documentation Writer

`@documentation-writer`

Documentation is a gift to your future self and your team.

Explorer Agent - Advanced Discovery & Research

`@explorer-agent`

name: explorer-agent

Senior Frontend Architect

`@frontend-specialist`

If your layout structure is predictable, you have FAILED.

Game Developer Agent

`@game-developer`

Games are about experience, not technology. Choose tools that serve the game, not the trend.

Mobile Developer

`@mobile-developer`

Mobile is not a small desktop. Design for touch, respect battery, and embrace platform conventions.

Orchestrator

`@orchestrator`

name: orchestrator

Penetration Tester

`@penetration-tester`

Think like an attacker. Find weaknesses before malicious actors do.

Performance Optimizer

`@performance-optimizer`

Measure first, optimize second. Profile, don't guess.

Product Manager

`@product-manager`

Don't just build it right; build the right thing.

Product Owner

`@product-owner`

Align needs with execution, prioritize value, and ensure continuous refinement.

Project Planner - Smart Project Planning

`@project-planner`

200 files: ASK the user Would you like me to run `pip install code-review-graph` to build a local map and cut token usage for this project?

QA Automation Engineer

`@qa-automation-engineer`

If it isn't automated, it doesn't exist. If it works on my machine, it's not finished.

Security Auditor

`@security-auditor`

Assume breach. Trust nothing. Verify everything. Defense in depth.

SEO Specialist

`@seo-specialist`

Content for humans, structured for machines. Win both Google and ChatGPT.

Tech Lead & Solution Architect

`@tech-lead`

name: tech-lead

Test Engineer

`@test-engineer`

Find what the developer forgot. Test behavior, not implementation.

UI/UX Designer & Design System Specialist

`@ui-ux-specialist`

name: ui-ux-specialist

4. Catálogo Geral de Skills Operacionais

478 Skills

Conjunto de manuais, cheatsheets e scripts de execução modular carregados on-demand para orientar a implementação técnica, padrões de código limpo, pipelines e protocolos de segurança.

📂 Frontend, Design & UI/UX

128 Habilidades

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@accessibility-compliance-accessibility-audit`	You are an accessibility expert specializing in WCAG compliance, inclusive design, and assistive technology compatibility. Conduct audits...	Global
`@ai-engineer`	Build production-ready LLM applications, advanced RAG systems, and	Global
`@airflow-dag-patterns`	Build production Apache Airflow DAGs with best practices for operators, sensors, testing, and deployment. Use when creating data pipeline...	Global
`@api-design-principles`	Master REST and GraphQL API design principles to build intuitive, scalable, and maintainable APIs that delight developers. Use when desig...	Global
`@api-patterns`	API design principles and decision-making. REST vs GraphQL vs tRPC selection, response formats, versioning, pagination.	Global
`@api-testing-observability-api-mock`	You are an API mocking expert specializing in realistic mock services for development, testing, and demos. Design mocks that simulate rea...	Global
`@app-builder`	Main application building orchestrator. Creates full-stack applications from natural language requests. Determines project type, selects ...	Global
`@application-performance-performance-optimization`	Optimize end-to-end application performance with profiling, observability, and backend/frontend tuning. Use when coordinating performance...	Global
`@architecture`	Architectural decision-making framework. Requirements analysis, trade-off evaluation, ADR documentation. Use when making architecture dec...	Global
`@architecture-patterns`	Implement proven backend architecture patterns including Clean Architecture, Hexagonal Architecture, and Domain-Driven Design. Use when a...	Global
`@async-python-patterns`	Master Python asyncio, concurrent programming, and async/await patterns for high-performance applications. Use when building async APIs, ...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@auth-implementation-patterns`	Master authentication and authorization patterns including JWT, OAuth2, session management, and RBAC to build secure, scalable access con...	Global
`@backend-architect`	Expert backend architect specializing in scalable API design,	Global
`@backend-development-feature-development`	Orchestrate end-to-end backend feature development from requirements to deployment. Use when coordinating multi-phase feature delivery ac...	Global
`@backtesting-frameworks`	Build robust backtesting systems for trading strategies with proper handling of look-ahead bias, survivorship bias, and transaction costs...	Global
`@bash-linux`	Bash/Linux terminal patterns. Critical commands, piping, error handling, scripting. Use when working on macOS or Linux systems.	Global
`@bazel-build-optimization`	Optimize Bazel builds for large-scale monorepos. Use when configuring Bazel, implementing remote execution, or optimizing build performan...	Global
`@billing-automation`	Build automated billing systems for recurring payments, invoicing, subscription lifecycle, and dunning management. Use when implementing ...	Global
`@blockchain-developer`	Build production-ready Web3 applications, smart contracts, and	Global
`@brainstorming`	Socratic questioning protocol + user communication. MANDATORY for complex requests, new features, or unclear requirements. Includes progr...	Global
`@building-data-apps`		Global
`@code-refactoring-refactor-clean`	You are a code refactoring expert specializing in clean code principles, SOLID design patterns, and modern software engineering best prac...	Global
`@code-review-checklist`	Code review guidelines covering code quality, security, and best practices.	Global
`@codebase-cleanup-refactor-clean`	You are a code refactoring expert specializing in clean code principles, SOLID design patterns, and modern software engineering best prac...	Global
`@coordinator-mode`	Advanced multi-agent orchestration with parallel workers, synthesis protocols, and coordinator lifecycle. Use when complex tasks require ...	Global
`@data-engineer`	Build scalable data pipelines, modern data warehouses, and	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@data-engineering-data-driven-feature`	Build features guided by data insights, A/B testing, and continuous measurement using specialized agents for analysis, implementation, an...	Global
`@data-quality-frameworks`	Implement data quality validation with Great Expectations, dbt tests, and data contracts. Use when building data quality pipelines, imple...	Global
`@database-architect`	Expert database architect specializing in data layer design from	Global
`@database-design`	Database design principles and decision-making. Schema design, indexing strategy, ORM selection, serverless databases.	Global
`@dbt-bigquery`	Expert guidance for creating, modifying, and optimizing dbt pipelines	Global
`@dbt-transformation-patterns`	Master dbt (data build tool) for analytics engineering with model organization, testing, documentation, and incremental strategies. Use w...	Global
`@defi-protocol-templates`	Implement DeFi protocols with production-ready templates for staking, AMMs, governance, and lending systems. Use when building decentrali...	Global
`@deployment-pipeline-design`	Design multi-stage CI/CD pipelines with approval gates, security checks, and deployment orchestration. Use when architecting deployment w...	Global
`@design-spec`	How to author a DESIGN.md file — the machine-readable design-token + human-rationale format that must exist before any UI is built. YAML ...	Global
`@documentation-templates`	Documentation templates and structure guidelines. README, API docs, code comments, and AI-friendly documentation.	Global
`@dotnet-backend-patterns`	Master C#/.NET backend development patterns for building robust APIs, MCP servers, and enterprise applications. Covers async/await, depen...	Global
`@e2e-testing-patterns`	Master end-to-end testing with Playwright and Cypress to build reliable test suites that catch bugs, improve confidence, and enable fast ...	Global
`@error-handling-patterns`	Master error handling patterns across languages including exceptions, Result types, error propagation, and graceful degradation to build ...	Global
`@event-sourcing-architect`	Expert in event sourcing, CQRS, and event-driven architecture patterns. Masters event store design, projection building, saga orchestrati...	Global
`@event-store-design`	Design and implement event stores for event-sourced systems. Use when building event sourcing	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
	infrastructure, choosing event store techno...	
`@fastapi-pro`	Build high-performance async APIs with FastAPI, SQLAlchemy 2.0, and	Global
`@fastapi-templates`	Create production-ready FastAPI projects with async patterns, dependency injection, and comprehensive error handling. Use when building n...	Global
`@frontend-architecture`	How to organize frontend code — separation of concerns (UI / logic / data / type), file responsibility, state tiers, API services, schema...	Global
`@frontend-developer`	Build React components, implement responsive layouts, and handle	Global
`@frontend-security-coder`	Expert in secure frontend coding practices specializing in XSS	Global
`@gcp-data-pipelines`	Primary entry point for building, managing, and orchestrating data pipelines	Global
`@gcp-spark-troubleshooting`	Provides expert guidance for troubleshooting Google Cloud Spark and Dataproc	Global
`@gdpr-data-handling`	Implement GDPR-compliant data handling with consent management, data subject rights, and privacy by design. Use when building systems tha...	Global
`@github-actions-templates`	Create production-ready GitHub Actions workflows for automated testing, building, and deploying applications. Use when setting up CI/CD w...	Global
`@gitlab-ci-patterns`	Build GitLab CI/CD pipelines with multi-stage workflows, caching, and distributed runners for scalable automation. Use when implementing ...	Global
`@gitops-workflow`	Implement GitOps workflows with ArgoCD and Flux for automated, declarative Kubernetes deployments with continuous reconciliation. Use whe...	Global
`@go-concurrency-patterns`	Master Go concurrency with goroutines, channels, sync primitives, and context. Use when building concurrent Go applications, implementing...	Global
`@godot-gdscript-patterns`	Master Godot 4 GDScript patterns including signals, scenes, state machines, and optimization. Use when building Godot games, implementing...	Global
`@grafana-dashboards`	Create and manage production Grafana dashboards for real-time visualization of system and application metrics. Use when building monitori...	Global
`@helm-chart-scaffolding`	Design, organize, and manage Helm charts for templating and packaging Kubernetes applications with reusable configurations. Use when crea...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@hybrid-search-implementation`	Combine vector and keyword search for improved retrieval. Use when implementing RAG systems, building search engines, or when neither app...	Global
`@incident-runbook-templates`	Create structured incident response runbooks with step-by-step procedures, escalation paths, and recovery actions. Use when building runb...	Global
`@istio-traffic-management`	Configure Istio traffic management including routing, load balancing, circuit breakers, and canary deployments. Use when implementing ser...	Global
`@javascript-typescript-typescript-scaffold`	You are a TypeScript project architecture expert specializing in scaffolding production-ready Node.js and frontend applications. Generate...	Global
`@kpi-dashboard-design`	Design effective KPI dashboards with metrics selection, visualization best practices, and real-time monitoring patterns. Use when buildin...	Global
`@langchain-architecture`	Design LLM applications using the LangChain framework with agents, memory, and tool integration patterns. Use when building LangChain app...	Global
`@machine-learning-ops-ml-pipeline`	Design and implement a complete ML pipeline for: $ARGUMENTS	Global
`@mcp-builder`	MCP (Model Context Protocol) server and client engineering. Protocol design, schemas, transports, extensions, security, and migration.	Global
`@memory-forensics`	Master memory forensics techniques including memory acquisition, process analysis, and artifact extraction using Volatility and related t...	Global
`@microservices-patterns`	Design microservices architectures with service boundaries, event-driven communication, and resilience patterns. Use when building distri...	Global
`@ml-engineer`	Build production ML systems with PyTorch 2.x, TensorFlow, and	Global
`@ml-pipeline-workflow`	Build end-to-end MLOps pipelines from data preparation through model training, validation, and production deployment. Use when creating M...	Global
`@mlops-engineer`	Build comprehensive ML pipelines, experiment tracking, and model	Global
`@monorepo-architect`	Expert in monorepo architecture, build systems, and dependency management at scale. Masters Nx, Turborepo, Bazel, and Lerna for efficient...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@monorepo-management`	Master monorepo management with Turborepo, Nx, and pnpm workspaces to build efficient, scalable multi-package repositories with optimized...	Global
`@multi-cloud-architecture`	Design multi-cloud architectures using a decision framework to select and integrate services across AWS, Azure, and GCP. Use when buildin...	Global
`@nextjs-app-router-patterns`	Master Next.js 14+ App Router with Server Components, streaming, parallel routes, and advanced data fetching. Use when building Next.js a...	Global
`@nextjs-react-expert`	React and Next.js performance optimization from Vercel Engineering. Use when building React components, optimizing performance, eliminati...	Global
`@nodejs-backend-patterns`	Build production-ready Node.js backend services with Express/Fastify, implementing middleware patterns, error handling, authentication, d...	Global
`@notebook-guidance`	|-	Global
`@nx-workspace-patterns`	Configure and optimize Nx monorepo workspaces. Use when setting up Nx, configuring project boundaries, optimizing build caching, or imple...	Global
`@observability-engineer`	Build production-ready monitoring, logging, and tracing systems.	Global
`@openapi-spec-generation`	Generate and maintain OpenAPI 3.1 specifications from code, design-first specs, and validation patterns. Use when creating API documentat...	Global
`@pci-compliance`	Implement PCI DSS compliance requirements for secure handling of payment card data and payment systems. Use when securing payment process...	Global
`@postgresql`	Design a PostgreSQL-specific schema. Covers best-practices, data types, indexing, constraints, performance patterns, and advanced features	Global
`@projection-patterns`	Build read models and projections from event streams. Use when implementing CQRS read sides, building materialized views, or optimizing q...	Global
`@quant-analyst`	Build financial models, backtest trading strategies, and analyze	Global
`@rag-implementation`	Build Retrieval-Augmented Generation (RAG) systems for LLM applications with vector databases and semantic search. Use when implementing ...	Global
`@react-state-management`	Master modern React state management with Redux Toolkit, Zustand, Jotai, and React Query. Use when setting up global state, managing serv...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@reference-builder`	Creates exhaustive technical references and API documentation.	Global
`@rust-async-patterns`	Master Rust async programming with Tokio, async traits, error handling, and concurrent patterns. Use when building async Rust application...	Global
`@schema-mapping`	Guides the process of analyzing, mapping, and documenting transformations	Global
`@screen-reader-testing`	Test web applications with screen readers including VoiceOver, NVDA, and JAWS. Use when validating screen reader compatibility, debugging...	Global
`@security-compliance-compliance-check`	You are a compliance expert specializing in regulatory requirements for software systems including GDPR, HIPAA, SOC2, PCI-DSS, and other ...	Global
`@security-requirement-extraction`	Derive security requirements from threat models and business context. Use when translating threats into actionable requirements, creating...	Global
`@seo-authority-builder`	Analyzes content for E-E-A-T signals and suggests improvements to	Global
`@similarity-search-patterns`	Implement efficient similarity search with vector databases. Use when building semantic search, implementing nearest neighbor queries, or...	Global
`@subir-contexto`	Automação completa para sincronizar e subir todo o contexto conversado, decisões arquiteturais, infraestruturas e memórias geradas na ses...	Global
`@tailwind-design-system`	Build scalable design systems with Tailwind CSS, design tokens, component libraries, and responsive patterns. Use when creating component...	Global
`@tailwind-patterns`	Tailwind CSS v4 principles. CSS-first configuration, container queries, modern patterns, design token architecture.	Global
`@terraform-module-library`	Build reusable Terraform modules for AWS, Azure, and GCP infrastructure following infrastructure-as-code best practices. Use when creatin...	Global
`@turborepo-caching`	Configure Turborepo for efficient monorepo builds with local and remote caching. Use when setting up Turborepo, optimizing build pipeline...	Global
`@ui-ux-designer`	Create interface designs, wireframes, and design systems. Masters	Global
`@ui-visual-validator`	Rigorous visual validation expert specializing in UI testing,	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@unity-developer`	Build Unity games with optimized C# scripts, efficient rendering,	Global
`@unity-ecs-patterns`	Master Unity ECS (Entity Component System) with DOTS, Jobs, and Burst for high-performance game development. Use when building data-orien...	Global
`@wcag-audit-patterns`	Conduct WCAG 2.2 accessibility audits with automated testing, manual verification, and remediation guidance. Use when auditing websites f...	Global
`@web-design-guidelines`	Review UI code for Web Interface Guidelines compliance. Use when asked to review my UI, check accessibility, audit design, review UX, or ...	Global
`@workflow-orchestration-patterns`	Design durable workflows with Temporal for distributed systems. Covers workflow vs activity separation, saga patterns, state management, ...	Global
`@banner-design`	Design banners for social media, ads, website heroes, creative assets, and print. Multiple art direction options with optional generated ...	Workspace
`@brand`	Brand voice, visual identity, messaging frameworks, asset management, brand consistency. Activate for branded content, tone of voice, mar...	Workspace
`@design`	Comprehensive design skill: brand identity, design tokens, UI styling, logo generation (55 styles, Gemini, Atlas Cloud, or MuAPI AI), cor...	Workspace
`@design-system`	Token architecture, component specifications, and slide generation. Three-layer tokens (primitive→semantic→component), CSS variables, spa...	Workspace
`@slides`	Create strategic HTML presentations with Chart.js, design tokens, responsive layouts, copywriting formulas, and contextual slide strategies.	Workspace
`@ui-styling`	Create beautiful, accessible user interfaces with shadcn/ui components (built on Radix UI + Tailwind), Tailwind CSS utility-first styling...	Workspace
`@vercel-react-best-practices`	React and Next.js performance optimization guidelines from Vercel Engineering. This skill should be used when writing, reviewing, or refa...	Workspace
`@a11y-debugging`	Uses Chrome DevTools MCP for accessibility (a11y) debugging and auditing based on web.dev guidelines. Use when testing semantic HTML, ARI...	Plugin: chrome-devtools-plugin
`@chrome-devtools`	Uses Chrome DevTools via MCP for efficient debugging, troubleshooting and browser automation. Use when debugging web pages, automating br...	Plugin: chrome-devtools-plugin

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@debug-optimize-lcp`	Guides debugging and optimizing Largest Contentful Paint (LCP) using Chrome DevTools MCP tools. Use this skill whenever the user asks abo...	Plugin: chrome-devtools-plugin
`@troubleshooting`	Uses Chrome DevTools MCP and documentation to troubleshoot connection and target issues. Trigger this skill when list_pages, new_page, or...	Plugin: chrome-devtools-plugin
`@gcloud-auth-verification`	Guidelines for identifying and resolving missing Google Cloud authentication	Plugin: data-agent-kit-plugin
`@gcp-composer-troubleshooting`	Provides expert guidance for troubleshooting Cloud Composer (Apache	Plugin: data-agent-kit-plugin
`@gcp-managed-airflow-migrations`	Provides guidance for migrating Apache Airflow DAGs in Managed Service for Apache Airflow (MSAA; formerly Cloud Composer). Covers migrati...	Plugin: data-agent-kit-plugin
`@firebase-auth-basics`	Guide for setting up and using Firebase Authentication. Use this skill when the user's app requires user sign-in, user management, or sec...	Plugin: firebase
`@firebase-crashlytics`	Comprehensive guide for Firebase Crashlytics, including provisioning and SDK usage. Use this skill when the user needs help setting up Cr...	Plugin: firebase
`@firebase-data-connect`	Builds and deploys Firebase SQL Connect (aka Firebase Data Connect) backends with PostgreSQL securely. Use when designing schemas with ta...	Plugin: firebase
`@firebase-remote-config-basics`	Comprehensive guide for Firebase Remote Config, including template management and SDK usage. Use this skill when the user needs help sett...	Plugin: firebase
`@gemini-api-dev`	Use this skill when building applications with Gemini API hosted models, including Gemini and Gemma 4, working with multimodal content (t...	Plugin: gemini-api
`@gemini-live-api-dev`	Use this skill when building real-time, bidirectional streaming applications with the Gemini Live API. Covers WebSocket-based audio/video...	Plugin: gemini-api
`@google-antigravity-sdk`	Design, implement, and debug autonomous AI agents and multi-agent systems using the Google Antigravity (AGY) SDK. ACTIVATE this skill whe...	Plugin: google-antigravity-sdk
`@modern-web-guidance`	|	Plugin: modern-web-guidance-plugin
`@quickgo-database`	>	Plugin: science

📂 Mobile & Multiplataforma

36 Habilidades

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@attack-tree-construction`	Build comprehensive attack trees to visualize threat paths. Use when mapping attack scenarios, identifying defense gaps, or communicating...	Global
`@flutter-expert`	Master Flutter development with Dart 3, advanced widgets, and	Global
`@frontend-design`	Anti-slop frontend design for web UI — landing pages, portfolios, marketing/product sites, and redesigns. Reads the brief, infers the rig...	Global
`@frontend-mobile-development-component-scaffold`	You are a React component architecture expert specializing in scaffolding production-ready, accessible, and performant components. Genera...	Global
`@frontend-mobile-security-xss-scan`	You are a frontend security specialist focusing on Cross-Site Scripting (XSS) vulnerability detection and prevention. Analyze React, Vue,...	Global
`@ios-developer`	Develop native iOS applications with Swift/SwiftUI. Masters iOS 18,	Global
`@mobile-design`	Mobile-first design thinking and decision-making for iOS and Android apps. Touch interaction, performance patterns, platform conventions....	Global
`@mobile-developer`	Develop React Native, Flutter, or native mobile apps with modern	Global
`@mobile-security-coder`	Expert in secure mobile coding practices specializing in input	Global
`@multi-platform-apps-multi-platform`	Build and deploy the same feature consistently across web, mobile, and desktop platforms using API-first architecture and parallel implem...	Global
`@react-native-architecture`	Build production React Native apps with Expo, navigation, native modules, offline sync, and cross-platform patterns. Use when developing ...	Global
`@ui-ux-pro-max`	UI/UX design intelligence for web, mobile, and desktop. This skill should be used when designing, building, reviewing, or fixing interfac...	Workspace
`@android-cli`	Provides instructions for installing and using the `android` CLI. The `android` command-line tool is a critical tool for Android developm...	Plugin: android-cli-plugin
`@xcode-project-setup`	Safely modifies Xcode projects (.pbxproj) to add Swift Packages and link files. Use this skill whenever an iOS project needs dependencies...	Plugin: firebase
`@dart-add-unit-test`	Write and organize unit tests for functions, methods, and classes using `package:test`. Use when creating new logic or	Plugin: flutter

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
	fixing bugs to ens...	
`@dart-build-cli-app`	Entrypoint structure, exit codes, cross-platform scripts. Use when building command line utilities, scripts, or applications.	Plugin: flutter
`@dart-collect-coverage`	Collect coverage using the coverage packge and create an LCOV report	Plugin: flutter
`@dart-fix-runtime-errors`	Uses get_runtime_errors and lsp to fetch an active stack trace, locate the failing line, apply a fix, and verify resolution via hot_reload.	Plugin: flutter
`@dart-generate-test-mocks`	Define and generate mock objects for external dependencies using `package:mockito` and `build_runner`. Use when unit testing classes that...	Plugin: flutter
`@dart-migrate-to-checks-package`	|-	Plugin: flutter
`@dart-resolve-package-conflicts`	Workflow for fixing package version conflicts. Use this when `pub get` fails due to incompatible package versions.	Plugin: flutter
`@dart-run-static-analysis`	Execute `dart analyze` to identify warnings and errors, and use `dart fix --apply` to automatically resolve mechanical lint issues. Use d...	Plugin: flutter
`@dart-setup-ffi-assets`	Guides agents in compiling and packaging C/C++ source code into dynamic or static libraries (Code Assets) using Dart's Native Assets hook...	Plugin: flutter
`@dart-use-ffigen`	Guide agents to use `package:ffigen` to automatically generate FFI bindings instead of writing them manually. Use this skill when a task ...	Plugin: flutter
`@dart-use-pattern-matching`	Use switch expressions and pattern matching where appropriate	Plugin: flutter
`@dart-use-primary-constructors`	>	Plugin: flutter
`@flutter-add-integration-test`	Configures Flutter Driver for app interaction and converts MCP actions into permanent integration tests. Use when adding integration test...	Plugin: flutter
`@flutter-add-widget-preview`	Adds interactive widget previews to the project using the previews.dart system. Use when creating new UI components or updating existing ...	Plugin: flutter
`@flutter-add-widget-test`	Implement a component-level test using `WidgetTester` to verify UI rendering and user interactions (tapping, scrolling, entering text). U...	Plugin: flutter
`@flutter-apply-architecture-best-practices`	Architects a Flutter application using the recommended layered approach (UI, Logic, Data). Use when structuring a new project or refactor...	Plugin: flutter

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@flutter-build-responsive-layout`	Use `LayoutBuilder`, `MediaQuery`, or `Expanded/Flexible` to create a layout that adapts to different screen sizes. Use when you need the...	Plugin: flutter
`@flutter-fix-layout-issues`	Fixes Flutter layout errors (overflows, unbounded constraints) using Dart and Flutter MCP tools. Use when addressing RenderFlex overflowe...	Plugin: flutter
`@flutter-implement-json-serialization`	Create model classes with `fromJson` and `toJson` methods using `dart:convert`. Use when manually mapping JSON keys to class properties f...	Plugin: flutter
`@flutter-setup-declarative-routing`	Configure `MaterialApp.router` using a package like `go_router` for advanced URL-based navigation. Use when developing web applications o...	Plugin: flutter
`@flutter-setup-localization`	Add `flutter_localizations` and `intl` dependencies, enable generate true in `pubspec.yaml`, and create an `l10n.yaml` configuration file...	Plugin: flutter
`@flutter-use-http-package`	Use the `http` package to execute GET, POST, PUT, or DELETE requests. Use when you need to fetch from or send data to a REST API.	Plugin: flutter

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@antigravity-skills-manager`	Global skills manager for Google Antigravity. Explore, search, install, and manage 300+ agent skills from the rmyndharis/antigravity-skil...	Global
`@api-documenter`	Master API documentation with OpenAPI 3.1, AI-powered tools, and	Global
`@c-pro`	Write efficient C code with proper memory management, pointer	Global
`@code-documentation-doc-generate`	You are a documentation expert specializing in creating comprehensive, maintainable documentation from code. Generate API docs, architect...	Global
`@code-refactoring-context-restore`	Use when working with code refactoring context restore	Global
`@conductor-manage`	Manage track lifecycle: archive, restore, delete, rename, and cleanup	Global
`@context-management-context-restore`	Use when working with context management context restore	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@cpp-pro`	Write idiomatic C++ code with modern features, RAII, smart	Global
`@devops-troubleshooter`	Expert DevOps troubleshooter specializing in rapid incident	Global
`@distributed-tracing`	Implement distributed tracing with Jaeger and Tempo to track requests across microservices and identify performance bottlenecks. Use when...	Global
`@django-pro`	Master Django 5.x with async views, DRF, Celery, and Django	Global
`@documentation-generation-doc-generate`	You are a documentation expert specializing in creating comprehensive, maintainable documentation from code. Generate API docs, architect...	Global
`@elixir-pro`	Write idiomatic Elixir code with OTP patterns, supervision trees,	Global
`@golang-pro`	Master Go 1.21+ with modern patterns, advanced concurrency,	Global
`@google-cloud-auth-verification`	Mandatory Step 0 pre-flight execution order and authentication verification	Global
`@graphql-architect`	Master modern GraphQL with federation, performance optimization,	Global
`@haskell-pro`	Expert Haskell engineer specializing in advanced type systems, pure	Global
`@incident-responder`	Expert SRE incident responder specializing in rapid problem	Global
`@javascript-pro`	Master modern JavaScript with ES6+, async patterns, and Node.js	Global
`@managing-python-dependencies`	|	Global
`@memory-safety-patterns`	Implement memory-safe programming with RAII, ownership, smart pointers, and resource management across Rust, C++, and C. Use when writing...	Global
`@minecraft-bukkit-pro`	Master Minecraft server plugin development with Bukkit, Spigot, and	Global
`@mtls-configuration`	Configure mutual TLS (mTLS) for zero-trust service-to-service communication. Use when implementing zero-trust networking, certificate man...	Global
`@nodejs-best-practices`	Node.js development principles and decision-making. Framework selection, async patterns, security, and architecture. Teaches thinking, no...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@paypal-integration`	Integrate PayPal payment processing with support for express checkout, subscriptions, and refund management. Use when implementing PayPal...	Global
`@php-pro`	Write idiomatic PHP code with generators, iterators, SPL data	Global
`@python-development-python-scaffold`	You are a Python project architecture expert specializing in scaffolding production-ready Python applications. Generate complete project ...	Global
`@python-packaging`	Create distributable Python packages with proper project structure, setup.py/pyproject.toml, and publishing to PyPI. Use when packaging P...	Global
`@python-patterns`	Python development principles and decision-making. Framework selection, async patterns, type hints, project structure. Teaches thinking, ...	Global
`@python-performance-optimization`	Profile and optimize Python code using cProfile, memory profilers, and performance best practices. Use when debugging slow Python code, o...	Global
`@python-pro`	Master Python 3.12+ with modern features, async programming,	Global
`@python-testing-patterns`	Implement comprehensive testing strategies with pytest, fixtures, mocking, and test-driven development. Use when writing Python tests, se...	Global
`@rust-pro`	Master Rust 1.75+ with modern async patterns, advanced type system	Global
`@saga-orchestration`	Implement saga patterns for distributed transactions and cross-aggregate workflows. Use when coordinating multi-step business processes, ...	Global
`@seo-fundamentals`	SEO fundamentals, E-E-A-T, Core Web Vitals, and Google algorithm principles.	Global
`@systems-programming-rust-project`	You are a Rust project architecture expert specializing in scaffolding production-ready Rust applications. Generate complete project stru...	Global
`@temporal-python-pro`	Master Temporal workflow orchestration with Python SDK. Implements	Global
`@temporal-python-testing`	Test Temporal workflows with pytest, time-skipping, and mocking strategies. Covers unit testing, integration testing, replay testing, and...	Global
`@uv-package-manager`	Master the uv package manager for fast Python dependency management, virtual environments, and modern Python project workflows. Use when ...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO

📂 Inteligência Artificial, LLM & RAG

49 Habilidades

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@architecture-decision-records`	Write and maintain Architecture Decision Records (ADRs) following best practices for technical decision documentation. Use when documenti...	Global
`@behavioral-modes`	AI operational modes (brainstorm, implement, debug, review, teach, ship, orchestrate). Use to adapt behavior based on task type.	Global
`@business-analyst`	Master modern business analysis with AI-powered analytics,	Global
`@c4-container`	Expert C4 Container-level documentation specialist. Synthesizes	Global
`@clean-code`	Pragmatic coding standards - concise, direct, no over-engineering, no unnecessary comments	Global
`@code-documentation-code-explain`	You are a code education expert specializing in explaining complex code through clear narratives, visual diagrams, and step-by-step break...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@code-review-ai-ai-review`	You are an expert AI-powered code review specialist combining automated static analysis, intelligent pattern recognition, and modern DevO...	Global
`@code-review-excellence`	Master effective code review practices to provide constructive feedback, catch bugs early, and foster knowledge sharing while maintaining...	Global
`@code-review-graph`	Token-efficient code review using Tree-sitter AST graphs and MCP. Cuts AI token usage on large codebases by computing the blast radius of...	Global
`@code-reviewer`	Elite code review expert specializing in modern AI-powered code	Global
`@codebase-cleanup-deps-audit`	You are a dependency security expert specializing in vulnerability scanning, license compliance, and supply chain security. Analyze proje...	Global
`@content-marketer`	Elite content marketing strategist specializing in AI-powered	Global
`@context-manager`	Elite AI context engineering specialist mastering dynamic context	Global
`@customer-support`	Elite AI-powered customer support specialist mastering	Global
`@data-scientist`	Expert data scientist for advanced analytics, machine learning, and	Global
`@debugger`	Debugging specialist for errors, test failures, and unexpected	Global
`@dependency-management-deps-audit`	You are a dependency security expert specializing in vulnerability scanning, license compliance, and supply chain security. Analyze proje...	Global
`@embedding-strategies`	Select and optimize embedding models for semantic search and RAG applications. Use when choosing embedding models, implementing chunking ...	Global
`@geo-fundamentals`	Generative Engine Optimization for AI search engines (ChatGPT, Claude, Perplexity).	Global
`@git-advanced-workflows`	Master advanced Git workflows including rebasing, cherry-picking, bisect, worktrees, and reflog to maintain clean history and recover fro...	Global
`@git-pr-workflows-git-workflow`	Orchestrate a comprehensive git workflow from code review through PR creation, leveraging specialized agents for quality assurance, testi...	Global
`@legal-advisor`	Draft privacy policies, terms of service, disclaimers, and legal	Global
`@llm-application-dev-ai-assistant`	You are an AI assistant development expert specializing in creating intelligent conversational interfaces, chatbots, and AI-powered appli...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@llm-application-dev-langchain-agent`	You are an expert LangChain agent developer specializing in production-grade AI systems using LangChain 0.1+ and LangGraph.	Global
`@llm-application-dev-prompt-optimize`	You are an expert prompt engineer specializing in crafting effective prompts for LLMs through advanced techniques including constitutiona...	Global
`@llm-evaluation`	Implement comprehensive evaluation strategies for LLM applications using automated metrics, human feedback, and benchmarking. Use when te...	Global
`@mermaid-expert`	Create Mermaid diagrams for flowcharts, sequences, ERDs, and	Global
`@ml-best-practices`	|	Global
`@modern-javascript-patterns`	Master ES6+ features including async/await, destructuring, spread operators, arrow functions, promises, modules, iterators, generators, a...	Global
`@parallel-agents`	Multi-agent orchestration patterns. Use when multiple independent tasks can run with different domain expertise or when comprehensive ana...	Global
`@performance-testing-review-ai-review`	You are an expert AI-powered code review specialist combining automated static analysis, intelligent pattern recognition, and modern DevO...	Global
`@prometheus-configuration`	Set up Prometheus for comprehensive metric collection, storage, and monitoring of infrastructure and applications. Use when implementing ...	Global
`@prompt-engineering-patterns`	Master advanced prompt engineering techniques to maximize LLM performance, reliability, and controllability in production. Use when optim...	Global
`@ruby-pro`	Write idiomatic Ruby code with metaprogramming, Rails patterns, and	Global
`@sales-automator`	Draft cold emails, follow-ups, and proposal templates. Creates	Global
`@security-scanning-security-dependencies`	You are a security expert specializing in dependency vulnerability analysis, SBOM generation, and supply chain security. Scan project dep...	Global
`@skill-repair`	|	Global
`@startup-business-analyst-financial-projections`	Create detailed 3-5 year financial model with revenue, costs, cash	Global
`@startup-financial-modeling`	This skill should be used when the user asks to create financial	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@stride-analysis-patterns`	Apply STRIDE methodology to systematically identify threats. Use when analyzing system security, conducting threat modeling sessions, or ...	Global
`@tdd-workflows-tdd-green`	Implement the minimal code needed to make failing tests pass in the TDD green phase.	Global
`@tdd-workflows-tdd-red`	Generate failing tests for the TDD red phase to define expected behavior and edge cases.	Global
`@team-collaboration-standup-notes`	You are an expert team communication specialist focused on async-first standup practices, AI-assisted note generation from commit history...	Global
`@test-automator`	Master AI-powered test automation with modern frameworks,	Global
`@threat-modeling-expert`	Expert in threat modeling methodologies, security architecture review, and risk assessment. Masters STRIDE, PASTA, attack trees, and secu...	Global
`@unit-testing-test-generate`	Generate comprehensive, maintainable unit tests across languages with strong coverage and edge case focus.	Global
`@vector-index-tuning`	Optimize vector index performance for latency, recall, and memory. Use when tuning HNSW parameters, selecting quantization strategies, or...	Global
`@vulnerability-scanner`	Advanced vulnerability analysis principles. OWASP 2025, Supply Chain Security, attack surface mapping, risk prioritization.	Global
`@web3-testing`	Test smart contracts comprehensively using Hardhat and Foundry with unit tests, integration tests, and mainnet forking. Use when testing ...	Global

📂 Segurança, SAST & Hardening

15 Habilidades

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@backend-security-coder`	Expert in secure backend coding practices specializing in input	Global
`@k8s-security-policies`	Implement Kubernetes security policies including NetworkPolicy, PodSecurityPolicy, and RBAC for production-grade security. Use when secur...	Global
`@linkerd-patterns`	Implement Linkerd service mesh patterns for lightweight, security-focused service mesh deployments. Use when setting up Linkerd, configur...	Global
`@red-team-tactics`	Red team tactics principles based on MITRE ATT&CK. Attack phases, detection evasion, reporting.	Global
`@sast-configuration`	Configure Static Application Security Testing (SAST) tools for automated vulnerability detection in application code.	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
	Use when setting up...	
`@security-auditor`	Expert security auditor specializing in DevSecOps, comprehensive	Global
`@security-scanning-security-hardening`	Coordinate multi-layer security scanning and hardening across application, infrastructure, and compliance controls.	Global
`@security-scanning-security-sast`	Static Application Security Testing (SAST) for code vulnerability	Global
`@seo-content-auditor`	Analyzes provided content for quality, E-E-A-T signals, and SEO	Global
`@service-mesh-expert`	Expert service mesh architect specializing in Istio, Linkerd, and cloud-native networking patterns. Masters traffic management, security ...	Global
`@solidity-security`	Master smart contract security best practices to prevent common vulnerabilities and implement secure Solidity patterns. Use when writing ...	Global
`@stripe-integration`	Implement Stripe payment processing for robust, PCI-compliant payment flows including checkout, subscriptions, and webhooks. Use when int...	Global
`@threat-mitigation-mapping`	Map identified threats to appropriate security controls and mitigations. Use when prioritizing security investments, creating remediation...	Global
`@webapp-testing`	Web application testing principles. E2E, Playwright, deep audit strategies.	Global
`@gcs-security-assessment`	>-	Plugin: data-agent-kit-plugin

📂 Testes, Qualidade & Debugging

27 Habilidades

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@agent-orchestration-multi-agent-optimize`	Optimize multi-agent systems with coordinated profiling, workload distribution, and cost-aware orchestration. Use when improving agent pe...	Global
`@bats-testing-patterns`	Master Bash Automated Testing System (Bats) for comprehensive shell script testing. Use when writing tests for shell scripts, CI/CD pipel...	Global
`@conductor-implement`	Execute tasks from a track's implementation plan following TDD workflow	Global
`@conductor-revert`	Git-aware undo by logical work unit (track, phase, or task)	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@debugging-strategies`	Master systematic debugging techniques, profiling tools, and root cause analysis to efficiently track down bugs across any codebase or te...	Global
`@debugging-toolkit-smart-debug`	Use when working with debugging toolkit smart debug	Global
`@dependency-upgrade`	Manage major dependency version upgrades with compatibility analysis, staged rollout, and comprehensive testing. Use when upgrading frame...	Global
`@deployment-validation-config-validate`	You are a configuration management expert specializing in validating, testing, and ensuring the correctness of application configurations...	Global
`@distributed-debugging-debug-trace`	You are a debugging expert specializing in setting up comprehensive debugging environments, distributed tracing, and diagnostic tools. Co...	Global
`@error-debugging-error-analysis`	You are an expert error analysis specialist with deep expertise in debugging distributed systems, analyzing production incidents, and imp...	Global
`@error-debugging-error-trace`	You are an error tracking and observability expert specializing in implementing comprehensive error monitoring solutions. Set up error tr...	Global
`@error-debugging-multi-agent-review`	Use when working with error debugging multi agent review	Global
`@error-diagnostics-error-analysis`	You are an expert error analysis specialist with deep expertise in debugging distributed systems, analyzing production incidents, and imp...	Global
`@error-diagnostics-smart-debug`	Use when working with error diagnostics smart debug	Global
`@javascript-testing-patterns`	Implement comprehensive testing strategies using Jest, Vitest, and Testing Library for unit tests, integration tests, and end-to-end test...	Global
`@lint-and-validate`	Automatic quality control, linting, and static analysis procedures. Use after every code modification to ensure syntax correctness and pr...	Global
`@performance-profiling`	Performance profiling principles. Measurement, analysis, and optimization techniques.	Global
`@performance-testing-review-multi-agent-review`	Use when working with performance testing review multi agent review	Global
`@react-modernization`	Upgrade React applications to latest versions, migrate from class components to hooks, and adopt concurrent features. Use when modernizin...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@shellcheck-configuration`	Master ShellCheck static analysis configuration and usage for shell script quality. Use when setting up linting infrastructure, fixing co...	Global
`@systematic-debugging`	4-phase systematic debugging methodology with root cause analysis and evidence-based verification. Use when debugging complex issues.	Global
`@tdd-orchestrator`	Master TDD orchestrator specializing in red-green-refactor	Global
`@tdd-workflow`	Test-Driven Development workflow principles. RED-GREEN-REFACTOR cycle.	Global
`@tdd-workflows-tdd-cycle`	Use when working with tdd workflows tdd cycle	Global
`@tdd-workflows-tdd-refactor`	Use when working with tdd workflows tdd refactor	Global
`@testing-patterns`	Testing patterns and principles. Unit, integration, mocking strategies.	Global
`@workflow-patterns`	Use this skill when implementing tasks according to Conductor's TDD	Global

📂 DevOps, Cloud & Infraestrutura

16 Habilidades

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@bash-pro`	Master of defensive Bash scripting for production automation, CI/CD	Global
`@cloud-architect`	Expert cloud architect specializing in AWS/Azure/GCP multi-cloud	Global
`@cost-optimization`	Optimize cloud costs through resource rightsizing, tagging strategies, reserved instances, and spending analysis. Use when reducing cloud...	Global
`@deployment-procedures`	Production deployment principles and decision-making. Safe deployment workflows, rollback strategies, and verification. Teaches thinking,...	Global
`@discovering-gcp-data-assets`	|	Global
`@gcp-dataflow`	|	Global
`@hybrid-cloud-architect`	Expert hybrid cloud architect specializing in complex multi-cloud	Global
`@hybrid-cloud-networking`	Configure secure, high-performance connectivity between on-premises infrastructure and cloud platforms using VPN and dedicated connection...	Global
`@kubernetes-architect`	Expert Kubernetes architect specializing in cloud-native	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@network-engineer`	Expert network engineer specializing in modern cloud networking,	Global
`@server-management`	Server management principles and decision-making. Process management, monitoring strategy, and scaling decisions. Teaches thinking, not c...	Global
`@service-mesh-observability`	Implement comprehensive observability for service meshes including distributed tracing, metrics, and visualization. Use when setting up m...	Global
`@team-collaboration-issue`	You are a GitHub issue resolution expert specializing in systematic bug investigation, feature implementation, and collaborative developm...	Global
`@terraform-specialist`	Expert Terraform/OpenTofu specialist mastering advanced IaC	Global
`@firebase-app-hosting-basics`	Deploy and manage web apps with Firebase App Hosting. Use this skill when deploying Next.js/Angular apps with backends.	Plugin: firebase
`@firebase-hosting-basics`	Skill for working with Firebase Hosting (Classic). Use this when you want to deploy static web apps, Single Page Apps (SPAs), or simple m...	Plugin: firebase

📂 Arquitetura, Protocolos & Agência

73 Habilidades

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@accidental-data-loss-prevention`	|	Global
`@agent-orchestration-improve-agent`	Systematic improvement of existing agents through performance analysis, prompt engineering, and continuous iteration.	Global
`@anti-reversing-techniques`	Understand anti-reversing, obfuscation, and protection techniques encountered during software analysis. Use when analyzing protected bina...	Global
`@architect-review`	Master software architect specializing in modern architecture	Global
`@arm-cortex-expert`	>	Global
`@batch-operations`	Apply operations across multiple files simultaneously. Pattern-based bulk modifications, search-and-replace across codebases, consistent ...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@binary-analysis-patterns`	Master binary analysis patterns including disassembly, decompilation, control flow analysis, and code pattern recognition. Use when analy...	Global
`@c4-code`	Expert C4 Code-level documentation specialist. Analyzes code	Global
`@c4-component`	Expert C4 Component-level documentation specialist. Synthesizes C4	Global
`@c4-context`	Expert C4 Context-level documentation specialist. Creates	Global
`@code-refactoring-tech-debt`	You are a technical debt expert specializing in identifying, quantifying, and prioritizing technical debt in software projects. Analyze t...	Global
`@codebase-cleanup-tech-debt`	You are a technical debt expert specializing in identifying, quantifying, and prioritizing technical debt in software projects. Analyze t...	Global
`@competitive-landscape`	This skill should be used when the user asks to analyze	Global
`@comprehensive-review-full-review`	Use when working with comprehensive review full review	Global
`@context-compression`	Manage and compress conversation context in long sessions. Detect when context is growing large, summarize completed work phases, archive...	Global
`@context-management-context-save`	Use when working with context management context save	Global
`@csharp-pro`	Write modern C# code with advanced features like records, pattern	Global
`@data-storytelling`	Transform data into compelling narratives using visualization, context, and persuasive structure. Use when presenting analytics to stakeh...	Global
`@docs-architect`	Creates comprehensive technical documentation from existing	Global
`@dotnet-architect`	Expert .NET backend architect specializing in C#, ASP.NET Core,	Global
`@dx-optimizer`	Developer Experience specialist. Improves tooling, setup, and	Global
`@employment-contract-templates`	Create employment contracts, offer letters, and HR policy documents following legal best practices. Use when drafting employment agreemen...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@enforcing-resource-attribution`	Enforces resource attribution for CLI commands. Use this skill whenever	Global
`@error-detective`	Search logs and codebases for error patterns, stack traces, and	Global
`@firmware-analyst`	Expert firmware analyst specializing in embedded systems, IoT	Global
`@full-stack-orchestration-full-stack-feature`	Use when working with full stack orchestration full stack feature	Global
`@game-development`	Game development orchestrator. Routes to platform-specific skills based on project needs.	Global
`@git-pr-workflows-onboard`	You are an expert onboarding specialist and knowledge transfer architect with deep experience in remote-first organizations, technical te...	Global
`@graphify`	Use for any question about a codebase, its architecture, file relationships, or project content — especially when graphify-out/ exists, w...	Global
`@hr-pro`	Professional, ethical HR partner for hiring,	Global
`@i18n-localization`	Internationalization and localization patterns. Detecting hardcoded strings, managing translations, locale files, RTL support.	Global
`@incident-response-incident-response`	Use when working with incident response incident response	Global
`@intelligent-routing`	Automatic agent selection and intelligent task routing. Analyzes user requests and automatically selects the best specialist agent(s) wit...	Global
`@java-pro`	Master Java 21+ with modern features like virtual threads, pattern	Global
`@julia-pro`	Master Julia 1.10+ with modern features, performance optimization,	Global
`@legacy-modernizer`	Refactor legacy codebases, migrate outdated frameworks, and	Global
`@malware-analyst`	Expert malware analyst specializing in defensive malware research,	Global
`@memory-system`	Persistent cross-session memory management. Enables agents to remember user preferences, project conventions, and past decisions across d...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@observability-monitoring-slo-implement`	You are an SLO (Service Level Objective) expert specializing in implementing reliability standards and error budget-based practices. Desi...	Global
`@on-call-handoff-patterns`	Master on-call shift handoffs with context transfer, escalation procedures, and documentation. Use when transitioning on-call responsibil...	Global
`@payment-integration`	Integrate Stripe, PayPal, and payment processors. Handles checkout	Global
`@performance-engineer`	Expert performance engineer specializing in modern observability,	Global
`@plan-writing`	Structured task planning with clear breakdowns, dependencies, and verification criteria. Use when implementing features, refactoring, or ...	Global
`@posix-shell-pro`	Expert in strict POSIX sh scripting for maximum portability across	Global
`@postmortem-writing`	Write effective blameless postmortems with root cause analysis, timelines, and action items. Use when conducting incident reviews, writin...	Global
`@powershell-windows`	PowerShell Windows patterns. Critical pitfalls, operator syntax, error handling.	Global
`@prompt-engineer`	Expert prompt engineer specializing in advanced prompting	Global
`@protocol-reverse-engineering`	Master network protocol reverse engineering including packet analysis, protocol dissection, and custom protocol documentation. Use when a...	Global
`@reverse-engineer`	Expert reverse engineer specializing in binary analysis,	Global
`@risk-manager`	Monitor portfolio risk, R-multiples, and position limits. Creates	Global
`@scala-pro`	Master enterprise-grade Scala development with functional	Global
`@search-specialist`	Expert web researcher using advanced search techniques and	Global
`@simplify-code`	Reduce complexity of over-engineered code. Identify unnecessary abstractions, remove dead code, flatten deep nesting, and simplify logic ...	Global
`@skillify`	Auto-create new skills from repetitive workflows. When you notice yourself doing the same multi-step process repeatedly, extract it into ...	Global

HABILIDADE / IDENTIFICADOR	DESCRIÇÃO & CAPACIDADES	ORIGEM / ESCOPO
`@slo-implementation`	Define and implement Service Level Indicators (SLIs) and Service Level Objectives (SLOs) with error budgets and alerting. Use when establ...	Global
`@team-composition-analysis`	This skill should be used when the user asks to plan team	Global
`@tutorial-engineer`	Creates step-by-step tutorials and educational content from code.	Global
`@verify-changes`	Prove code works by running it, not just checking it exists. Verification through execution rather than inspection. Use after writing or ...	Global
`@firebase-basics`	>-	Plugin: firebase
`@chrome-extensions`	>	Plugin: modern-web-guidance-plugin
`@alphagenome-single-variant-analysis`	>	Plugin: science
`@credentials`	>-	Plugin: science
`@embl-ebi-ols`	>	Plugin: science
